

Quick Start

eSafeMe Pro

Thank you for choosing our products. This guide will explain the steps to start and set-up the LoneWorker security on your smartphones fleet from the Neosafe web interface.

Application installation

You can download the eSafeMe Pro software from the Google Play Store on the smartphone.

. The set up the software on the smartphone, please follow the **Set Up Process**.

Extensions installation

Download the free extensions **eSafeMe Picture**, **eSafeMe Text** or **eSafeMe Guard** (require a license).

The .apk files of these softwares are available form the **Download** page on our website neosafe.fr.

Web Interface connection

You can access to the web interface from the **Client access** button on our website neosafe.fr. You will need your Login and Password previously provided by Neosafe.

The Dashboard page then appears :

The screenshot shows the NeoSafe web interface dashboard. The sidebar on the left contains the following menu items: Dashboard, Follow up, Settings, Tags & Forms, Messenger, OTHERS, Write us, and Help. The main dashboard area is titled 'TITLE PAGE' and contains several widgets:

- LICENSES:** A widget showing license status: 'Nombre total de licences : 4', 'Nombre de licences libre : 0', and 'Nombre de licences associées : 4'. It includes a 'Type your text' input field and a 'LICENSES SETTINGS' button.
- MY PROFILE:** A widget displaying user information: 'First Name : LOIC', 'Last Name : Delagneau', 'Login :', and 'Level : Administrator'. It has an 'EDIT MY PROFILE' button.
- LAST CONTACT:** A widget listing recent contacts with their names, IDs, and last contact times: 'Core X3 - 2' (00 sec), 'Core X3 - 1' (03 sec), 'Core X3 - 3 Rouge' (24 min 40 sec), and 'BE XC3' (23 h 06 min).
- ALARMS STATISTICS:** A widget with a bar chart showing 'ALARMS STATISTICS'. The chart has a y-axis from 0 to 120 and a single red bar at 100, labeled 'SOS'.
- NOTIFICATIONS:** A widget showing 'No notification at this time.'
- MESSENGER:** A widget showing 'No threads were found' and a brief description of the messenger tool.

Illustration 2: Licenses management

Note : the smartphone's IMEI number is available when you dial ***#06#** on the phone's keypad.

Connection's test

Start the eSafeMe Pro application and press the  button to test the connection between your smartphone and our servers. **OK** must appear if the test is successful. If not, please check that the IMEI number is correctly written in the web interface.

The LoneWorker security is ON

Generate a SOS and a fall

In order to learn the basics of the eSafeMe Pro's LoneWorker security, please watch the **videos** that show how to generate a SOS event and a Fall event.

Events managements

It is possible to set up actions following a specific event (SOS event, Fall event, Immobility event...) using different channels :

Mails

You can schedule an e-mail to specific addresses. To set an e-mail up, select **Settings**, then in the **Events** tab, select the triggering event in the first board and the Mail channel in the second board. You can then add the mail addresses that will receive an e-mail when the triggering event appears.

Vocal server (option)

You can schedule a cascade call from a vocal server to specific phone numbers. To configure a call cascade, select **Settings**, then in the **Events** tab, select the triggering event in the first board and the Phone Call channel in the second board. You can now add the number that will be called when the triggering event appears.

Remote Monitoring (option)

You can schedule a cascade call from a remote monitoring company (SECURITAS ALERT SERVICES) to specific phone numbers. To configure a call cascade, select **Settings**, then in the **Event** tab, select the triggering event in the first board. You can now check the box in the Monitoring column. You must now add the phone number that will be called by the monitoring company in the **Safety** tab.

LoneWorker Protection Settings

To configure the LoneWorker Protection settings, select **Settings**, then in the **Smartphones** tab, select the smartphone you want to configure and click on the L.W. button (LoneWorker). The LoneWorker setting window opens, which allow to configure the features of the LoneWorker Protection, listed in different tabs (fall down, immobility, SOS...). Press **Save** to send the settings to the LoneWorker smartphone. A pop-up will appears on the smartphone to inform the user that the LoneWorker configuration is updated.

Events Follow-up

Select **Follow-up**, then in the **Traces** tab, you can find all the event that occurs on the LoneWorker smartphone, gathered in a board form. You can see all the informations about a specific event in the associated line.
